This is the best training I've ever experienced! *Upbeat, Moving, and Personal.* Thank You for the style you brought to the class. From the moment we walked in, we were greeted with a smile and handshake. I felt like I was a person not a client right from the start

With leadership classes I've taken in the past, you are forced to sit and listen with little ability to discuss your situation. Kate and David let you speak at will, and use your personal situation to educate everyone on how you could resolve a problem or deal with a certain situation. I never felt scared to be open with this type of teaching.

I never looked at my watch once! I sure will be looking for opportunities to attend more of your classes.

I have used heartfelt leadership skills since attending the class; I have had a more positive attitude, been in a happier mood, and shrugged off little things that used to bother me before. I am a better person today for meeting Kate and David, and will continue to use their teachings as a means of good leadership.

Awakening, Refreshing, Warming. David and Kate's relationship with one another made this experience so much more unique and engaging than I could have ever expected. They're energy and cues with one another are what really made the experience something to learn from and grow...feeling ready to be a game-changer in the workplace.

“I’ve been to a lot of leadership trainings...this brought it all together for me...the light went on.” - **Jim Hamilton, Dominion Energy Transmission**

“It’s not often, if ever, that anyone has an opportunity to attend a seminar or training where the facilitators present from the heart and the heads! David and Kate have nailed it! They have a heartfelt way of engaging their audience while the listener’s inner self is enlightened and awakened. Powerful, Engaging, Enduring.”

Engaging, Empowering, Refreshing. I have no words for the beauty and truth I found in myself with your teaching methods. You are fascinating to watch together, brilliant.

Kate and David engaged the participants without the use of detailed PowerPoint slides and not only encouraged but facilitated open dialog from each participant. The small group helped with that level of introspection from each person making the experience more valuable on a more personal level. Both were very laid back, knowledgeable, personable, and non-judgmental. I appreciated the open space, so to say, for participants to share situations from their own workplace.
